It's certainly nice to shop for items from the comfort of your home whenever you want, but how do you know you're getting good deals when you go online to buy stuff? Many online retailers offer promo codes or coupon codes to entice you to shop on their sites. All you need are a few simple tips to help you find the coupons you need to save money. Here's a few pointers for finding online promo codes for your favorite retailers,Join Email Lists If you're willing to put up with getting additional emails, signing up for email lists for your favorite retailers can pay off in big savings. Many retailers offer exclusive promo codes for customers on their email lists. You might even receive a special code immediately just for signing up. Be sure to look closely at codes when you receive them. Most codes have expiration dates and restrictions on usage. Make sure you know the rules before trying to use them.Follow Retailers on Social Media Savvy shoppers who use social media are often rewarded for following their favorite retailers online. Most stores have Facebook, Twitter and Instagram pages, and it can pay off in exclusive promo codes if you follow them. The codes offer everything from substantial discounts and sales to daily deals and presales on new items. Following a store on social media can also be fun, giving you the inside scoop on the best ways to shop there and save money.Leave Items in Your Cart If you go online to buy something and you don't like the price or aren't sure about the purchase, leave the item in your cart. In many cases, you'll get an email from the retailer offering you a special discount on a purchase or on the specific item you left in your cart. Online stores don't want you to be "the one that got away," and they will try to entice you with a discount. You get to decide if the discount is enough to convince you to take the plunge and make the purchase.Visit Coupon Websites Some websites are solely in the business of providing coupon codes for different stores. Type "coupon codes" into your favorite search engine and visit the sites. You can even add the specific item or retailer to narrow the search even more. Many of sites offer promo codes for a vast number of retailers and update their codes daily. Sometimes you can even find more than one code to use on your shopping spree.Erase Your Browser's Cookies Before Shopping This may sound like a weird tip, but it has multiple benefits. If you clear your browser's cache and delete cookies, you could see better prices on the items you want. You might also see coupon codes you haven't seen before. Getting rid of your history of looking for specific promo codes or deals tricks the retailer into thinking you haven't shopped for that item or looked for that promo before. You can achieve the same effect by shopping with your browser set to "private" or "incognito" mode. This practice increases your chances of finding better deals all around.
